

# SUITECOMMERCE INSTORE

Transforming Point of Sale to Point of Commerce

SuiteCommerce InStore provides retailers with a solution that unifies the physical and digital shopping experiences within a single, cloud-based commerce platform. Arm your sales associates with a mobile device that provides complete inventory and customer information to engage customers more effectively, drive more sales and provide a satisfying shopping experience.

## Key Benefits

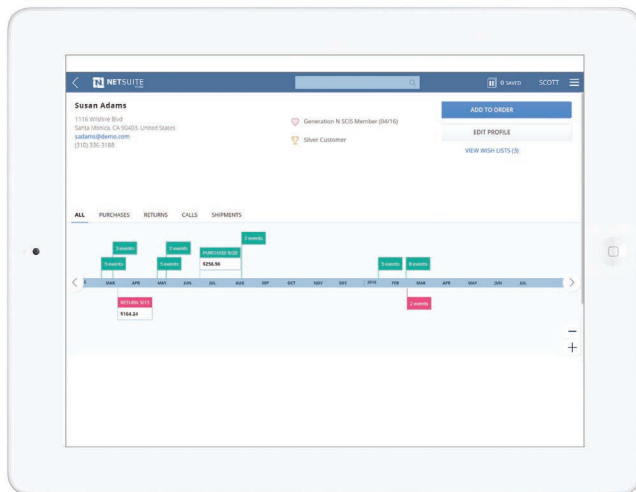

- **Eliminate integrations** between separate systems with your ecommerce and point-of-sale natively tied to your operational business systems on a unified cloud-based platform.
- **Engage shoppers** by providing a complete shopping experience that is personal and seamless.
- **Empower your in-store associates** with the tools and information to assist and engage shoppers.
- **Increase profitability** with more product choices and better convenience with an 'endless aisle' of goods.
- **Support a global brand or expansion** from a single deployment.

## Designed for Mobility

- **Full-featured POS.** Perform traditional point of sale transactions (e.g. cash and carry, exchanges, returns, etc.) quickly and easily.
- **Deploy anywhere.** Commoditized hardware with software delivered via the cloud drastically reduces TCO and roll out costs.
- **Easy-to-use and mobile.** Touch tablet user interface and responsive design technology delivers easy-to-use digital selling and servicing capabilities across any device for engaging with customers anywhere at any time in the store.

## Omnichannel Servicing

- **Seamless, unified experience.** Create wish lists in one channel (i.e. online, phone, or in-store) and transact in another channel. From visibility into saved carts and product wish lists, to finding items in any location, and then selecting store pick-up or delivery options.

See all customer interactions and transaction across all touchpoints and channels.

**Full-featured POS** performs traditional sales transactions quickly and easily.

- **360-degree view of the customer.** Access to comprehensive customer information: amount of average transaction, average time between transactions, loyalty points, customer activity, customer statistics and more.
- **Orders.** Get full visibility of orders started or finished in any channel.

## Digital Selling

- **Dynamic merchandising.** Present upsells, cross-sells and related product recommendations based on merchant-driven rules such as location, 'bought also bought' patterns and more.
- **Inventory visibility.** Get real-time product availability across the entire enterprise to save every sale.
- **Out-of-the-box reporting.** View real-time sales reporting by time, item and tender type.
